WEDNESDAY UPDATE | CANADIAN INNOVATION

RAKABOT: a Canadian answer to wet boots and crowded entrances.

RAKABOT turns a familiar Canadian problem - melting snow, wet footwear and cluttered entrances - into a smarter storage opportunity. Its award-winning systems organize footwear vertically and guide water into removable containers, helping homes and shared spaces stay cleaner.

CANADA	PATENTED	10	IN STOCK
DESIGNED FOR OUR CLIMATE	**WATER-COLLECTION SYSTEM**	**DESIGN AWARDS**	**AVAILABLE FROM RANDMAR**
A Quebec-born solution made for wet and snowy entrances.	Angled shelves channel snowmelt into removable bins.	Recognized at the Grands Prix du Design in 2021 and 2023.	Core TITAN systems and service accessories are in Laval.

The story: solve the water problem, not just the storage problem

RAKABOT began with a simple observation: most shoe racks store footwear, but they do not manage what drips from it. Soaked mats, pooled boot trays and open shelves can leave water, salt and grit across the entrance. RAKABOT rethought the rack around Canadian winters, combining stacked storage with built-in drainage and collection.

How the system works

- **Drains:** footwear sits above the collected water instead of standing in a wet tray.
- **Channels:** angled shelves guide snowmelt, dirt and gravel toward the collection point.
- **Collects:** removable containers make it easy to empty the mess without dismantling the rack.
- **Organizes:** vertical storage frees floor space and creates a dedicated place for every pair.

A range for homes, workplaces and community spaces

Plastico offers accessible everyday storage for homes and smaller spaces. TITAN scales the patented drainage idea into durable multi-tier systems for schools, daycares, clinics, offices, gyms and recreation facilities. ZEUS adds integrated coat storage for high-traffic shared entrances. Benches, locker solutions, casters and replacement containers extend the system around the customer environment.

TITAN 2	47-inch, two-tier system storing up to 10 pairs; 16 units currently available in Laval, with additional replenishment on order.
TITAN OPTIONS	Modular panels, shelf configurations and commercial accessories support larger or more demanding entrance projects.
SERVICE PARTS	Replacement Plastico containers were received today; 48 units are currently available to support installed systems.

Why RAKABOT is a strong fit for Randmar

RAKABOT brings Randmar a differentiated Canadian brand with an easy-to-understand problem-and-solution story. It gives resellers access to practical products for both residential and commercial customers, while local inventory, replaceable components and scalable configurations create opportunities beyond the first sale.

RANDMAR ANGLE	This is exactly the kind of Canadian innovation that belongs in Randmar's portfolio: a real everyday problem, a visibly better solution and a product family that can grow from one home entrance to an entire school, clinic, gym or workplace.
