SHARP

FRIDAY UPDATE | SMARTER WORKSPACES

One screen size. Four ways to build a better workspace.

Sharp's new 27-inch MultiSync business monitors have arrived at Randmar. From everyday Full HD to USB-C, QHD and 4K, resellers can now match the monitor to the way each customer works.

DD-EA271F

FULL HD

Traditional inputs and USB hub

4 IN LAVAL

DD-EA272F

FULL HD + USB-C

One cable with up to 65W power

2 IN LAVAL

DD-EA272Q

QHD + USB-C

More workspace, Ethernet and 90W

2 IN LAVAL

DD-EA272U

4K UHD + USB-C

Maximum detail, Ethernet and 90W

2 IN LAVAL

A better way to sell the monitor conversation

Do not begin with four model numbers. Begin with the customer's workstation. Sharp provides a clear path from dependable Full HD to a connected USB-C desk, then to the larger working canvas of QHD and the fine detail of 4K. Every model keeps the same 27-inch format, a fully adjustable stand and a three-year warranty.

EVERYDAY OFFICE	DD-EA271F for general productivity and broad desktop compatibility.
LAPTOP WORKSPACE	DD-EA272F for USB-C simplicity and up to 65W laptop power.
MORE ROOM TO WORK	DD-EA272Q for QHD detail, Ethernet and up to 90W power.
MAXIMUM DETAIL	DD-EA272U for a 4K canvas, Ethernet and up to 90W power.

ASK BEFORE YOU QUOTE

- Desktop or laptop?
- Is USB-C charging important?
- Full HD, QHD or 4K workspace?
- Would Ethernet and a USB hub simplify the desk?
- One workstation or a larger deployment?

Why this assortment is ready to sell

Randmar now has four Sharp business-monitor choices in Canadian inventory. Resellers can build a simple good-better-best conversation for individual offices, shared desks, power users and consistent business deployments without moving away from the same 27-inch MultiSync family.

RANDMAR ANGLE	Sell the workspace, not only the screen. Start with how the customer connects and what they need to see, then move from everyday Full HD to USB-C simplicity, QHD productivity or detailed 4K performance.

Sources: Official Sharp Canada logo, product images and product information; Randmar product, specification and Laval inventory records reviewed November 13, 2026. Inventory, pricing and MAP requirements can change; confirm current details before advertising or quoting. USB-C power delivery depends on connected equipment and monitor settings.
